| •   |  |   |  |  |  |  |  |
|   |  |   |  |  |  |  |  |

Continuation of 11. does NOT place the application in condition for allowance because: applicant's argument that the combination of Okamura et al. with Kweon et al. is not readily apparent is not persuasive. Firstly, Kweon et al. does not disclose substituting Co or Mn with Mg or Al, as asserted by applicant. Instead, the patentees teach Co or Mn as an "A-metal" while Mg or Al are "B-metal" or "C-metal" types. See col. 4 line 37-64. These metals are present as proportions, not direct substitutions, and are maintained readable towards the claimed invention insofar as the relative amounts of these metals are within applicant's claimed range. See the detailed reasons set forth on page 2 of the January 24, 2007 Office action. Secondly, arguments drawn to Kweon et al. arguably teaching substitution of the Li site and not the Li site as allegedly claimed is not persuasive, as the claim is otherwise silent on this relationship in merely stating the range amounts for the coefficients a-c and x-z. Finally, the assertion that "the amount of substitution of Co in claim 1 (0.0002 - 0.008 molar ratio) is orders of magnitude less than those suggested in Okamura" is not found persuasive given that Kweon et al. teaches the required amounts, and insofar as Okamura et al. is relied upon solely to teach or at least suggest what the primary reference on its own does not teach. Thus, the addition of Na or K is maintained for the reasons made of record and as may be found in par. [0009] and par. [0011] of Kweon et al., i.e. maintaining the layer structure and chemical stability of the active material for lithium ion intercalation, which is the structure and function of both Okamura and Kweon. The examiner notes that arguments for the ODP rejection incorporate by reference those submitted for the prior art rejections, accordingly, the ODP rejection is maintained in parallel to the art rejections being maintained.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian Mercado whose telephone number is (571) 272-1289. The examiner can normally be reached on Monday through Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
